SUMMARY

Full Stack Engineer with 2.5+ years building production systems at high-growth startups. Shipped IoT fleet tracking across 200+ vehicles, payment integrations, automated WhatsApp communication pipelines, and real-time WebRTC systems — all tied directly to revenue and operational efficiency. Thrive in fast-moving product teams where ownership and speed matter.

EXPERIENCE

Full Stack Developer

Home Mechanic

April 2025 - Present, Delhi

- Built low-latency real-time video using **WebRTC**, cutting technician response time by **40%**.
- Built an automated customer communication pipeline using **BullMQ** and **Redis** — delivering live WhatsApp updates, pre/post inspection reports, and invoices upon job completion, covering **500+ customers**.
- Integrated **Razorpay** to enable end-to-end digital payments, replacing manual collection across **1,000+ customers**.
- Rebuilt company website from PHP to **Next.js** — implemented auth from scratch via MSG91, built a complete booking flow, and integrated Google Maps for location-based services.
- Dockerized and deployed services on DigitalOcean with CI/CD via GitHub Actions, reducing deployment time by **60%**.
- Built an in-house CRM from scratch, replacing Excel-based lead tracking and managing **500+ monthly leads** across the sales pipeline.

Software Developer

FuelBuddy

December 2023 - May 2025, Gurugram

- Built delivery slot allocation APIs that improved scheduling efficiency by **25%**, directly reducing operational costs and increasing order fulfillment capacity.
- Engineered high-throughput bulk order automation processing **500+ orders** in under 30 seconds, unlocking revenue at scale without proportional headcount growth.
- Developed Node.js APIs for IoT fleet tracking and real-time telemetry processing across **200+ vehicles**, enabling data-driven fleet optimization.
- Designed and shipped React-based internal dashboards consumed by operations and sales teams, improving visibility into revenue-critical delivery pipelines.
- Collaborated cross-functionally with product and ops to scope, prioritize, and ship features tied directly to customer retention and ARR growth.

Front-End Intern

FuelBuddy

May 2023 - December 2023, Gurugram

- Built Vue.js dashboards, integrated GraphQL APIs, and resolved UI bugs to improve ops team data visibility.
- Integrated **Google Maps API** for real-time fleet location tracking, giving ops teams live visibility into 200+ vehicles.
- Implemented JWT authentication for secure login, session management, and route protection.

EDUCATION

B.Tech in Computer Science and Technology

Jamia Hamdard University • New Delhi • 2024 • 8.48/10

SKILLS

Backend: Node.js, Express.js, REST APIs, Microservices, GraphQL, Prisma, Hasura, WebRTC, JWT Authentication, RBAC, Redis, BullMQ, Nginx

Frontend: React.js, Vue.js, Next.js, Tailwind CSS, HTML5, CSS3

Databases & Infrastructure: PostgreSQL, Docker, DigitalOcean, CI/CD, GitHub Actions

Languages: JavaScript, TypeScript, Python
